

**DBM20153-DISCRETE
MATHEMATICS**
Chapter 3

$p \wedge q$

$p \leftrightarrow q$

$\neg p$

$p \vee q$

$\equiv$

$p \vee q$

CHAPTER 3: BASIC LOGIC

3.1 Explain Propositional Logic

3.1.1 Explain compound proposition

- a) Negation
- b) Conjunction
- c) Disjunction
- d) Conditional
 - i) Converse
 - ii) Contrapositive
 - iii) Inverse
- e) Biconditional

CHAPTER 3: BASIC LOGIC

3.1.2 Construct truth table

- a) Tautology
- b) Contradiction
- c) Contingency

3.1.3 Write proposition logic in English

3.2 Explain predicate logic

3.2.1 Identify compound statement in predicate logic

3.2.2 Explain quantifier

- a) Universal Quantifier and Existential Quantifier
- b) Quantified statements

3.1 EXPLAIN PROPOSITIONAL LOGIC

A **proposition** (or **statement**) is a sentence that is either **True** or **False**.

- **Letters** are used to denote **propositional variables**.

Example: $p, q, r, s, \dots$

- The **truth value** of a proposition
 - True proposition (T)
 - False proposition (F)

EXAMPLES:

Proposition:

- $5 + 3 = 8$
- $10 / 2 = 4$
- 5 is an even number
- Today is Wednesday

True

False

Non-proposition:

- Where do you live **Question**
- Please answer the question correctly **Instruction**
- $x < 10$
Unknown value of x

EXERCISE A

1. Which of these sentences are proportions? What are the truth values of those that are propositions?
 - a) Kuala Lumpur is the capital of Malaysia.
 - b) $8 + 2 = 10$
 - c) $-48 < -47$
 - d) Do you want to go to a cinema?
 - e) Answer this question.
 - f) $x + 2 = 18$
 - g) Today is Monday.
 - h) Move this table to the other room

3.1.1 EXPLAIN COMPOUND PROPOSITION

Connectives in Proposition Logic

CONJUNCTION $P \wedge Q$ (READ AS P **AND** Q)

p	q	$p \wedge q$
T	T	T
T	F	F
F	T	F
F	F	F

Example:

p : $5 + 3 = 8$

q : A decade is 10 years.

$p \wedge q$

$5 + 3 = 8$ **and** a decade is 10 years.

Another answer:

$p \wedge q$

$5 + 3 = 8$ **but** a decade is 10 years.

EXERCISE B

1. Determine whether the statements are true (T) or false (F).

a) $3 + 2 = 5$ and $4 + 4 = 8$

b) Changlun is in Perlis and Alor Setar is in Kedah.

c) $-48 < -47$ and $25 + 3 = 38$

d) Duck has 4 legs and cat has wings.

e) $4x + 3x = 5x$ and $\frac{5}{4} + \frac{3}{7} = \frac{47}{28}$

DISJUNCTION $P \vee Q$ (READ AS P **OR** Q)

p	q	$p \vee q$
T	T	T
T	F	T
F	T	T
F	F	F

Example:

p : $5 + 3 = 8$

q : A decade is 10 years.

$p \vee q$

$5 + 3 = 8$ **or** a decade is 10 years.

EXERCISE C

1. Determine whether the statements are true (T) or false (F).

a) $3 + 2 = 5$ **or** $4 + 4 = 8$

b) Changlun is in Perlis **or** Alor Setar is in Kedah.

c) $-48 < -47$ **or** $25 + 3 = 38$

d) Duck has 4 legs **or** cat has wings.

e) $4x + 3x = 5x$ **or** $\frac{5}{4} + \frac{3}{7} = \frac{47}{28}$

NEGATION $\neg P$ (READ AS **NOT** P)

p	$\neg p$
T	F
F	T

Example:

Write the negation for each of the following propositions.

(a) $5 + 3 = 8$

(b) A decade is 10 years.

Answer:

(a) $5 + 3 \neq 8$

(b) A decade is **not** 10 years.

EXERCISE D

1. What is the negation of each of these propositions?

- a) Today is Tuesday.
- b) China is in Asia
- c) $2 + 1 = 3$
- d) All kittens are cute.
- e) No prime number is even.
- f) Some cookies are sweet.
- g) Every lawyer uses logic.
- h) No bullfrog has lovely eyes.

CONDITIONAL $P \rightarrow Q$ (READ AS IF P, THEN Q)

p	q	$p \rightarrow q$
T	T	T
T	F	F
F	T	T
F	F	T

Example:

p : I do my homework.

q : I get my allowance.

$p \rightarrow q$

If I do my homework, then I get an allowance.

ANOTHER WAYS TO EXPRESS CONDITIONAL STATEMENT:

- If p , q
- p is sufficient for q
- q if p
- q when p
- a necessary condition for q is p

CONVERSE, CONTRAPOSITIVE AND INVERSE

- Starting with a conditional statement $p \rightarrow q$, we can form some new conditional statement.
- There are three related conditional statements that occur so often which are CONVERSE, CONTRAPOSITIVE AND INVERSE

The proposition $(q \rightarrow p)$ is called the **CONVERSE** of $(p \rightarrow q)$

The proposition $(\neg q \rightarrow \neg p)$ is called the **CONTRAPOSITIVE** of $(p \rightarrow q)$

The proposition $(\neg p \rightarrow \neg q)$ is called the **INVERSE** of $(p \rightarrow q)$

EXAMPLE 9

What are the contrapositive, the converse, and the inverse of the conditional statement

“The home team wins whenever it is raining.”?

Solution:

The original statement can be rewritten as

“If it is raining , then the home team wins”

- *Contrapositive: “If the home team does not win, then it is not raining”*
- *Converse: “If the home team wins, then it is raining”*
- *Inverse: If it is not raining, then the home team does not win.”*

EXERCISE E

1. Let p be “It is cold” and q be “It is raining”. Give a simple sentence which describes each of the following statements:
 - a) $p \rightarrow q$
 - b) $q \rightarrow \neg p$
 - c) $\neg q \rightarrow \neg p$

2. State the converse, contrapositive, and inverse of the following conditional statements
“I come to class whenever there is going to be a quiz”.

BICONDITIONAL $P \leftrightarrow Q$ (READ AS P **IF AND ONLY IF** Q)

p	q	$p \leftrightarrow q$
T	T	T
T	F	F
F	T	F
F	F	T

Example:

p : You passed the Discrete Mathematics exam.

q : You scored 40% or higher.

$p \leftrightarrow q$

You passed the Discrete mathematics exam **if and only if** you scored 40% or higher.

ANOTHER WAYS TO EXPRESS BICONDITIONAL STATEMENT:

- p is necessary and sufficient for q
- if p then q , and conversely
- p iff q

EXERCISE F

1. Let p be “ It is cold” and q be “ It is raining”. Give a simple sentence which describes each of the following statements:

a) $p \leftrightarrow q$

b) $q \leftrightarrow \neg p$

EXERCISE G (QUESTION 1)

Which of these sentences are propositions? State the truth value of those that are propositions.

- a) If it snows, then the schools are closed.
- b) $x + 2$ is positive.
- c) Take the umbrella with you.
- d) No prime number is even.
- e) A triangle is not a polygon. (**polygon is a closed path*)

EXERCISE G (QUESTION 2)

Let p and q be the propositions

p : Andy is going to Brunei

q : Andy is having a holiday.

Express each of these propositions as an English sentence.

a) $\neg p$

b) $q \vee \neg p$

c) $\neg p \wedge \neg q$

d) $p \leftrightarrow q$

EXERCISE G (QUESTION 3)

Represent the sentences below as propositional expressions:

- a) Tom is a math major but not computer science major.
- b) You can either stay at the hotel and watch TV or you can go to the museum
- c) If it is below freezing, it is also snowing.

EXERCISE G (QUESTION 4)

Determine whether each of these statements is true or false.

- a) If $1 + 1 = 2$, then $2 + 2 = 5$
- b) If monkeys can fly, then $1 + 1 = 3$
- c) $2 + 2 = 4$ if and only if $1 + 1 = 2$
- d) $0 > 1$ if and only if $2 > 1$

PAST YEAR QUESTIONS SESI II:

2021/2022

QUESTION 1

Identify each of the following sentence whether a proposition or not and state the truth value.

- a) Is 2 a positive number? (1 mark)
- b) A triangle is a three-sided polygon (2 marks)
- c) $4 + 9 > 9$ (2 marks)

PAST YEAR QUESTIONS SESI II:

2021/2022

QUESTION 2

Let p denote “John is rich” and q denote “John is happy”. Write each statement in symbolic form using p and q .

- a) If John is rich, then he is unhappy.
- b) John is neither rich nor happy.
- c) It is necessary to be poor in order to be happy.
- d) John is unhappy if and only if he is poor.
- e) To be poor is to be unhappy.

(10 marks)

EXAMPLES:

Two propositions

p	q
T	T
T	F
F	T
F	F

Three propositions

p	q	r
T	T	T
T	T	F
T	F	T
T	F	F
F	T	T
F	T	F
F	F	T
F	F	F

EXAMPLE

Construct the truth table for

$$p \wedge (\neg p \vee \neg q)$$

SOLUTION

First, we know that there are 2 propositions involve

Therefore, there will be 4 rows in the truth table.

Next, there are brackets and 2 negations

(2 additional columns)

connected with the symbol $\vee$ (1 additional column)

and the last column is what we need to construct.

Construct the truth table for

$$p \wedge (\neg p \vee \neg q)$$

p	q	$\neg p$	$\neg q$	$\neg p \vee \neg q$	$p \wedge (\neg p \vee \neg q)$
T	T	F	F	F	F
T	F	F	T	T	T
F	T	T	F	T	F
F	F	T	T	T	F

EXERCISE H

Construct the truth table for each of the following:

a) $\neg p \wedge q$

b) $(\neg p \vee q) \rightarrow \neg q$

c) $p \wedge (\neg q \vee r)$

d) $\neg p \leftrightarrow q \vee r$

CHAPTER 3: BASIC LOGIC

3.2 Explain Predicate Logic

3.2.1 Identify the compound statement in predicate logic

3.2.2 Explain quantifier:

(a) Universal and Existential

(b) Quantified statements

EXERCISE K (CONT...)

3. Let $P(x)$ be the statement $x = x^2$. If the domain consists of the integers, what are the truth values?

a) $P(0)$

b) $P(1)$

c) $P(2)$

d) $P(-1)$
